

POND PRODUCTS

► KoiAqua System A Biopure

Highly concentrated, specialized, live bacteria solution.

- For ponds and fresh water tanks
- Biological filtration/Nitrification will begin immediately.
- Significantly augments the elimination of mulm, mud and other organic wastes.
- Reduces Ammonia/Ammonium, Nitrites, Nitrates, and Phosphates.
- Reduction of algae growth and the pathogenic germs that cause fish disease.
- Stimulates crystal clear water and spotless substrates.

► KoiAqua System B Biopower

Food Concentrate for improved biological balance and enhanced plant vitality.

- Enhances the growth of important biology. The bacterial fauna density of FreshAqua A will increase explosively when dosed concurrent with FreshAqua B.
- Important Carbon and trace element source for bacteria; nourishment for the biomass and water plants.
- Completely harmless for all fish, completely bio-degradable and non-polluting.

► KoiAqua System C Liquid Filtermedia

Liquid filter media. Significantly improves and develops the biology in ponds and fresh water tanks.

- Reduces cloudiness, algae growth and foul smelling water.
- For fish, FreshAqua C quickly alleviates the discomfort and unhealthy appearance caused by suboptimal water conditions.
- Significant colour improvement in Koi will become apparent with only a few dosages.
- 100 % natural ingredients.

► KoiAqua System D Filter Start

Biological starter solution for fresh water tanks, ponds and filter applications.

- A highly concentrated food source for all the necessary bacteria. FreshAqua D will immediately promote the establishment of bacterial strains from FreshAqua A.
- Activates and supports the metabolism of beneficial bacterial colonies.
- Shortens the cycling process.
- Sufficiently kick-starts biological activity with just a single dose.

PRODUCTS FOR HEALTHY FISH

► Aminoacid Concentrate Fish

Supports recovery after any illness, improves immune response, reduces susceptibility to illness

- Replenishes any amino acids that fish are unable to produce in sufficient quantity
- Increases overall survivability rate of juvenile fish while promoting much better coloration and growth
- Encourages better coloration in adult fish. Malnutrition is more readily compensated for.

To be used as an additive to boost the nutritional profile of staple food products.

► Immun Stabil Fish

Pure herbal extract additive for all Koi, freshwater and saltwater fish.

- Improvement of coloration and vitality of all fish.

Perfect for use as a prophylactic (preventative) addition to staple food products! Mix Immun Stabil Fish into the appropriate feed - at the latest at the first signs of any illness.

► Resistant Fish Concentrate

- Impedes the growth of protozoa, nuisance algae, fungus and parasites.
- Strengthens the immune system and improves growth in fish.
- Will bind inorganic compounds such as heavy metals.
- Will also bind organic contaminants such as microbials and decaying matter, e.g. Parasites, algae, bacteria, fungus, bird, fish, snail and worm excrement, rotting food and plant matter.
- Mucous membranes and gills are protected from ectoparasites and fungus due to the light coating effect.
- Supports recovery and healing of skin lesions and wounds through the anti-inflammatory properties of the ingredients.
- Will increase the growth of water plants as a side-effect of the above processes.

PRODUCTS FOR FRESH WATER TANKS AND SMALL PONDS

► FreshAqua A

Bacteria High Concentrate.

For small ponds and fresh water tanks.

Reduces Ammonia/Ammonium, Nitrites, Nitrates, and Phosphates. Significantly augments the elimination of mulm, mud and other organic wastes. Reduces pathogenic germs. Nitrification will begin immediately. Required carbonate hardness: min. 4°dkh, opt. ca. 6-8dkh. Required PH: ca. 7.5-8.5.

► FreshAqua B

Food Concentrate for improved biological balance and enhanced plant vitality. Carbon and trace element source for bacteria. The bacteria fauna density of FreshAqua A will increase explosively when dosed concurrent with FreshAqua B.

► FreshAqua C

Liquid Filter Media

Significantly improves and develops the biology in ponds and fresh water tanks.

- Reduces cloudiness, algae growth and foul smelling water.
- With fish, FreshAqua C quickly alleviates the discomfort and unhealthy appearance caused by suboptimal water conditions.
- 100 % natural ingredients.

► FreshAqua D

Biological starter solution for fresh water tanks, ponds and filter applications. FreshAqua D will immediately promote the establishment of bacterial strains from FreshAqua A.

Water maintenance – The Easy Way

KoiAqua and FreshAqua – The biological control systems for aquarium and pond pro's. KoiAqua and FreshAqua work by enabling the optimum conditions that promote improved water quality and the health of your fish.

KoiAqua System, FreshAqua System & the products of Korallenzucht.de

For many years, we at Korallenzucht have observed and experimented to develop methods and products to improve the water quality and biology in the very sensitive field of saltwater aquaria and coral propagation.

A few years ago we have expanded our research into the exciting fields of freshwater aquaria, Koi and Ponds. The results are the development of highly effective products of unparalleled quality allowing for the outstanding success in these areas.

The KoiAqua System and FreshAqua System, as with all of our products, are the result of our practical work with freshwater aquaria and ponds. Each of our products has been tested long-term with exceptional results on many different tank, pond and fish subjects. They are also highly concentrated and will serve to foster vibrant health effectively and efficiently.

All products are exclusively produced by Korallenzucht at our facility in Coburg.

If you have any questions, please feel free to contact us – we will always take care of your inquiries.

We are looking forward to your success with the KoiAqua System and FreshAqua System.

Regards,
the Korallenzucht.de Team, Coburg
